**Domestic Fire
Extinguisher F 2 J**

Allrounder Domestic Fire Extinguisher F 2 J

There are many hidden possibilities for fires in private households. Think of still fuming ash of cigarettes in the waste paper basket or a meat fondue which turns bad. But there are not only fires of class A and B; the number of fires of burning cooking oil and fat in kitchens is remarkable. Everybody knows how easy you can forget the meal on the stove when the telephone is ringing. It's getting really worse, when oil is heating itself until it spontaneously ignites and burns. If you use the wrong fire agent like water, the disaster begins: a **fat explosion** - putting the operator at risk. In a split of a second the whole kitchen can get up in flames. The 2 litre **Domestic Fire Extinguisher F 2 J** has been developed not only to deal specifically with fires resulting from cooking oils and fats, but also to fight fires of class A and B. Naturally, the F 2 J is made of first quality materials and meets the highest demands for safety.

Fire risks at home

- fires of burning cooking oil and fat in the kitchen
- defective household machinery
- forgotten electric irons
- towel next to the cooking stove
- cigarettes in the waste paper-basket
- overturned candles

Easy handling
