

Jockel Extinguishers Line

Gel

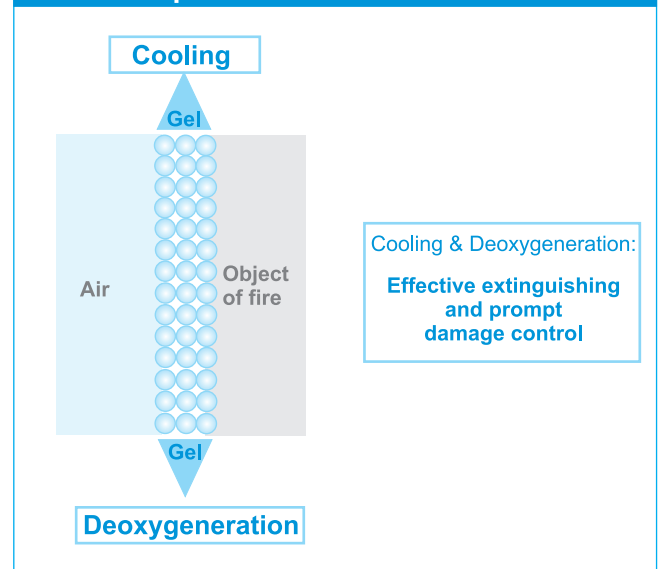

Active and preventive: Extinguishing with GEL

Extinguishing with GEL provides especially the perfect solution in case of special fires such as in the plastic processing industry, in recycling companies or at landfill sites.

GEL can be easily sprayed on the source of fire and forms a cooling and airtight layer. Apart from effective and prompt extinguishing those special GEL extinguishers can be preventively used as well.

Objects treated with GEL are hardly flammable off. The extinguishing GEL evaporates almost residue-free.

Mode of Operation

The solution for

- Plastic industry
- Tyre manufacturers
- Recycling companies
- Landfill sites
