Pacific Safety Products has taken their most popular PEP kits and made them even better. With a focus on ergonomic design, flexibility and durability, our improved PEP "A" Series demonstrates our commitment to effectively serving your needs. All of these professional series kits feature the following design advantages, making the A Series, the premium first responder kit on the market.

Comfort: Ergonomic design

PEP "A" Series Kits now carry closer to the body reducing strain on the shoulders and back.

Hygiene: Removable lining

The lining on all Semi Rigid kits can be fully removed to wash the kit. The lining and dividers are constructed of Plastazote® foam to withstand repetitive impacts and to provide an impervious barrier.

Flexibility: Low profile Velcro®

Low profile Velcro® is used on the lid lining and front pockets allowing for interchangeable modules and elastic loop configurations. Hook and loop on the inside of the kit provides a multitude of options for divider placement.

Durability: Reversed YKK® zippers

#10 YKK® zippers are reversed to eliminate wear on the coil prolonging the life of the strongest zipper on the market.

Value: Replaceable bottom with luggage feet

To prevent premature deterioration, PSP offers a Cordura® Plus 1000 denier nylon replaceable bottom with durable luggage feet.

Safety: Silver 3M™ Scotchlite™ reflective material

Silver 3M™ Scotchlite™ Reflective Material is used to make you highly visible to approaching motorists, increasing your personal safety.

Soft Pack Medical and Oxygen Kits

A200X Soft Pack Kit (Large)

The A200X is a rugged performer. Pockets are raised off the ground creating a streamlined kit. There are numerous elastic loops and pockets for easy access to supplies. This kit has a large center compartment, two large zippered end pockets and includes a strip of 3M™ Scotchlite™ reflective material to increase personal safety day or night.

Size: 22" L X 14" W X 11" H

Also available in a more compact size: [A400X Soft Pack Kit \(Small\)](#), with all the same features as the A200X.

Size: 18" L X 13" W X 11" H

Both the A200X and A400X can accommodate S400, S600, and S800 modules (extra charge).

A1100 Multi Pocket Medical Kit

Pacific's innovative "waterfall" pocket design makes this one of the most versatile mid-sized kits on the market. Numerous pockets allow organization of equipment in individual compartments. See-through mesh pockets and numerous elastic loops allow for easy access to supplies. The center pocket is framed with Plastazote® foam for protection and will accommodate compact AED models.

O100 O2 Bottle Carry Pack

The O100 oxygen bottle carry pack will hold a "D" size oxygen cylinder and is ideal for safely transporting oxygen and supplies. The built-in hooks allow for hands-free oxygen administration. The main body is padded with Plastazote® foam and the top cap with plastic/foam to protect gauges from damage. A removable accessory pouch is also included. Also available to hold an "E" size oxygen cylinder: [O200 O2 Bottle Carry Pack](#), with all the same features as the O100.

Semi Rigid Medical Kits

A300X Trauma Kit (Large)

The A300X provides a multitude of space for a wider range of trauma supplies. Complete with easy to access main compartment, the S500 utility pouch and numerous elastic loops; this is a top-quality kit. Fully adjustable inner pockets and inner dividers allow for flexibility when storing equipment. The inside lining and bottom can be conveniently removed when washing your kit.

Size: 22" L X 14" W X 11" H

Also available in a more compact size: **A500X Trauma Kit (Small)**, with all the same features as the A300X.

Size: 18" L X 14" W X 11" H

A300DX Advanced Life Support Kit (Large)

The A300DX provides a multitude of space for a wider range of trauma supplies. This advanced life support kit has an ergonomic design and includes the S400X Intubation Module, the S700X Ampoule Module and the S600X IV Administration Module. Fully adjustable inner pockets and inner dividers allow for flexibility when storing equipment. The inside lining and bottom can be conveniently removed when washing your kit.

Size: 22" L X 14" W X 11" H

Also available in a more compact size: **A500DX Advanced Life Support Kit (Small)**, and includes the S600 and S700 modules.

Size: 18" L X 14" W X 11" H

A500DX

Semi Rigid and Oxygen Medical Kits

A600X Comprehensive Trauma Kit

Built to withstand the rigors of Emergency Response, the A600X Trauma Kit provides storage and easy access for all of your trauma equipment. Designed to hold a "D" or "Jumbo D" oxygen cylinder, as well as accommodates Pacific's integrated modules, this kit allows for fast access to life saving supplies. The front pockets are equipped with low pro Velcro® and numerous elastic loops and pockets in order to store all your needed supplies in one location. The inside lining and bottom can be conveniently removed when washing your kit.

Size: 27"L X 15"W X 12"H

A1000X Modular Medical O2 Kit

The A1000X is a suitcase, backpack and daypack all rolled into one! This kit can be used for a number of applications from industrial first aid to advanced life support. This kit includes three pouches with clear vinyl windows and the main body includes adjustable dividers designed to accommodate a "D" or "Jumbo D" oxygen bottle. Constructed with Coroplast® corrugated plastic as well as Plastazote® foam to provide additional protection for equipment.

Size: 22"L X 9.5"W X 12"H

A900X Deluxe First Responder Kit

The A900X Deluxe First Responder Kit provides easy access to your emergency supplies and can accommodate an integrated module. Constructed with Plastazote® foam, it withstands repetitive impacts and offers an impervious barrier to fluids. Additional features include adjustable padded inner dividers for custom configuration and numerous elastic loops for storage of supplies. The inside lining can be conveniently removed when washing your kit.

Size: 13"L X 6"W X 13.5"H

Modules

Our modules are designed by paramedics with specific attention to organization of specialized instruments:

S400X Intubation

With space for a full set of airways, laryngoscope with blades, a full set of ET tubes, loop for tape storage, and numerous elastic loops for supply organization this kit makes your supplies easily and quickly accessible.

Size: 14" L X 9.5" W X 3" H

S600X IV

This module holds a full range of equipment necessary for starting IV's in the field. The S600 also includes loop for tape storage, and numerous well organized elastic loops for supplies.

Size: 12.5" L X 8" W X 3" H

S700X Ampoule

Customize your kit for the specific meds you carry. The vials pull out from individual high density foam compartments for easy organization; a clear vinyl window holds vials in place and allows for easy labeling of meds.

Size: 13" L X 5.25" W X 3" H

S800X Trauma

The Trauma Module holds a full complement of trauma supplies and/or first responder supplies. It also has the capability to convert into a hip pack for hands-free transportation. Use this module alone or add it to a larger Pacific kit.

Size: 12.5" L X 13" W X 5" H

What's so special about a Pacific Emergency Products® kit?

Pacific Safety Products Inc. prides itself on the quality of the products it supplies to emergency personnel worldwide. Because of this commitment to quality, each product is equipped with the following features where applicable:

Five Year Warranty

All Pacific Emergency Products® come with a full five year warranty on materials and workmanship! We don't expect that you will ever need to use it, but if a product should fail, PSP will repair or replace the item, at our option, with no charge to you. Damage caused by improper care, accident, or misuse will be repaired at a reasonable charge and you will be informed of any charges prior to repair. Replaceable bottoms are not a warranty item as they are designed to take the wear and tear that the kit normally would and thereby lengthen the life of your purchase. We are very proud of the quality of our products and are confident that you will be too!

DuPont® Cordura® Plus

Cordura® Plus 500 and 1000 denier nylon is three to fourteen times more durable than cotton, polyester, ordinary nylon and polypropylene, giving you the toughness advantage in your Pacific Emergency Products®. Cordura® Plus is lightweight, abrasion resistant, durable, dries quickly, is easy to care for, clean and "makes you one tough customer!"

3M™ Scotchlite™ Reflective Material

3M™ Scotchlite™ Reflective Material is designed to enhance day-time/night-time visibility of the user by making you highly visible to approaching motorists. When light is directed at the material, it is bounced back at the source with superior brilliance, increasing personal safety. An added advantage is it can be machine washed and dry cleaned. With 3M™ Scotchlite™ Reflective Material, your Pacific Emergency Products® can be imprinted with logos or text for a nominal fee.

Plastazote® Foam

Unlike many foams, Plastazote® withstands repetitive impacts and provides an impervious barrier to fluids and moisture. Proper foam linings are one of the least recognized, but most important features of all soft kits. Plastazote® is a medically inert, closed cell foam with excellent memory and impact absorption properties. All of Pacific Emergency Products® kits are reinforced and protected by Plastazote® high density polyethylene foam inserts.

Patented Replaceable Bottom

The first part of a soft kit to wear out is the bottom, so PSP invented the replaceable bottom to lengthen the lifetime of your purchase. Designed for a number of kits, the replaceable bottom is a unique feature in that it protects the kit bottom which comes into contact with destructive surfaces and substances more frequently than any other part of the kit. Pacific offers a standard Cordura® Plus 1000 denier nylon replaceable bottom as well as our H.D.P.E. plastic bottom providing the ultimate in kit protection. The plastic bottom can also be purchased separately and fitted to your existing Pacific Emergency Products® kit. The design of the H.D.P.E. plastic bottom is patent protected, US Patent #563318 and Canadian Patent #2138849. Because these features are replaceable items, they cannot be covered under warranty.

YKK Coil Zippers

YKK zippers are the strongest on the market increasing the lifetime of your Pacific Emergency Products® and further protecting your medical supplies. All Pacific Emergency Products® use YKK No. 5 and/or YKK No. 10 coil zippers.

Leather Handles

Most PSP kits come equipped with comfortable leather handles providing you with a durable, secure grip when transporting your medical supplies.

Caring for Your Pacific Emergency Products®

At PSP, we strive to bring you the finest quality emergency medical kits available today and, with proper care, we guarantee that you will receive years of unfailing service. Here are some recommendations to help you care for your Pacific Emergency Products®. Before putting your new kit into service, treat it with a fabric protector that is safe for use on nylon. This will help repel water and prevent stains from setting into the fabric.

When the replaceable bottom shows signs of wear, it should be replaced before any damage is caused to the kit itself.

When washing your kit, remove all inner foam, aluminum stays, replaceable bottoms and shoulder straps. Treat any stains with a household stain remover after testing for color fastness in an inconspicuous area. Machine wash on normal cycle in warm water. Hang to dry, or tumble dry on the delicate setting. Treat with fabric protector when dry.
