

RAMFAN Portable Propane Heating System

Portable Heat for Tents, Shelters and Confined Spaces

- Ideal for workers in canals, man-sized pipes, utility vaults and other enclosed areas.
- First Responders operating in tents and shelters.
- *No CO, only warm clean air omitted.*
- Compatible with UB20 Ventilation Systems.
- USA Output: 70,000 BTUs
Europe Output: 13.5kW

Now with Remote Thermostat Controls

Remote thermostat allows workers to regulate and maintain desired temperature within a confined space or enclosure. Use of the thermostat will increase worker comfort, maintain temperature and increase the life of the propane tank by 2 to 3 times. The heater and blower cycle on and off automatically reducing the need for outdoor workers to exit enclosed areas to adjust the heating system.

RAMFAN's Heating System is Certified to North America and European Standards

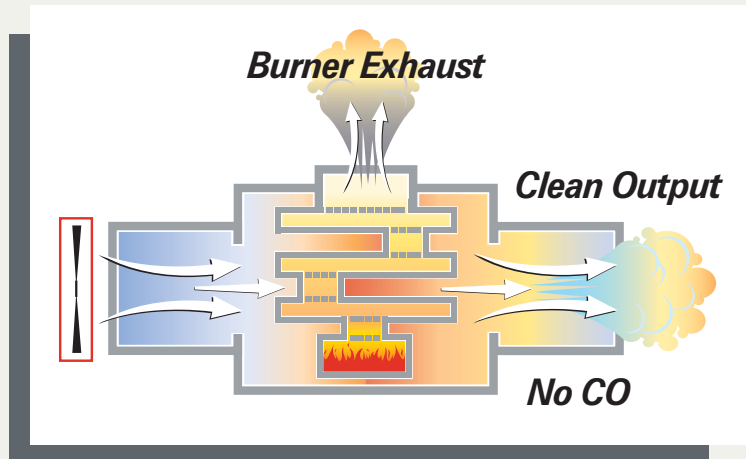

RAMFAN® UB20 Portable Propane Heating System is certified to U.S., Canada and Europe's Safety Standards for gas, electrical and CO emissions. The HA01 heater is certified for use with the UB20 blower to CSA standard #ANSI Z83.7-2000/CSA 2.14-2000. The HA02 and HA03 - CE Certification Directive (90/396/EEC), Appliance Type B₂₃, Gas Category I_{3p}.

Indirectly Fired Heater that Efficiently Produces 70,000 BTUs / 13.5kW of Clean, Warm Air

SAFE -

- The indirectly-fired heater uses a stainless steel heat exchanger that separates clean, warm air from burner exhaust.
- Clean air is vented into an enclosed area through the duct, while the burner exhaust is safely vented outside.
